

# DISCOVERY DAY CAMP

## Special Optional Programs for Senior Campers

### Future Leaders

The Future Leaders program, for incoming 7th through 9th graders, is offered for 2 or more weeks. The tweens in the program spend 2-3 partial days each week helping at camp. Participants assist with a young group, help prepare for a special event, or aid in specialist areas such as: art, swimming, drama, and sports. The rest of the time will be spent with their group leaders and peers, learning leadership skills, participating in activities, and swimming. Two half or one whole day each week are spent doing service projects such as PADS, packing books to send overseas, visiting a senior center facility, etc. The last day or two each week are spent on age appropriate field trips such as: climbing, high ropes course, boating, beach trip, professional ballgame, water park and more. The activities vary each session to allow the campers different choices. The goal of the program is to give tweens the opportunity to be leaders, participate in service, and have peer experiences.

### Young Artists

Boys and girls who enjoy art and are entering 4th through 6th grade will love the revamped Young Artist program. Campers will spend the majority of their week in a regular, gender specific, camp groups. Three times a week, the Young Artist will leave their camper group and join the other artists for extra art time (3-4 hours each week). Campers will experiment with different art forms and techniques, including ceramics, painting, photography, and drawing with charcoal. Children need not be experienced or gifted in art to be part of this group. They should, however, have an interest in improving their art skills.

### Explorers

Our four-week nature and water-oriented program is for boys and girls entering 5th or 6th grade. Campers participate in outdoor activities including kayaking, camping, orienteering, rock-climbing, rocketry, archery, outdoor cooking and group initiatives. Explorers should be able to swim comfortably in water over their heads. In swimming, we emphasize safety skills in and around the water. An important goal of the Explorer program is for campers to learn independent living skills. Explorers will participate in four exciting overnight trips. This program is limited to first session only.
